

# TAKIS WINS THE OPEN INFRASTRUCTURES FOR RESEARCH 2022 TENDER BY LAZIO INNOVA

Securing a **win** in the **Open Infrastructures for Research 2022** tender is a game-changer! This will allow us to create a **Rome GeneHub** in the heart of Castel Romano.

This **complex of specialized infrastructures** will be dedicated to **applied pharmaceutical research**, with a primary focus on **genetic vaccines, gene therapies and monoclonal antibodies**. Its pivotal role extends to pioneering breakthroughs in **treating rare diseases and cancer**, while enhancing capabilities in **Epidemic Preparedness**.

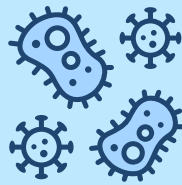

This will equip us with **four essential infrastructures:**

**GMP facility**

**BSL-3 biomodule**

**mAbLab**

**TissueLab**

The **Rome GeneHub** will be an **important driver of innovation for the Lazio** region and for **Italy**. We are looking forward to leverage on this infrastructure to **enhance our capacity for even more groundbreaking research and expand our service offerings to our clients.**

**STAY TUNED AND  
FOLLOW US FOR FUTURE  
UPDATES**  **@TAKIS**
